Dear Rudy,

Thank you for sending the "Fourth World Wars" piece. It is very good and very needed. A few suggestions: you might consider changing the statement that the Indians have been defended their territory since 1974 to since the 16th C.; actually there are considerably fewer ~~than~~ than 18,000 warriors.

You are right about the Sandinistas trying to manipulate the situation by having an external "public" policy of ~~amnesty and~~ amnesty and release of prisoners, and an internal policy of controlling the Indians ~~politically~~ politically and militarily. For example, the Sandmans are now moving to organize "white" Indians as a political group (those 30 pieces of silver people in Managua) so that they can later negotiate with them over Indian rights. Typical colonial situation. Similar to what the British~~x~~ did when they created Miskito "Kings." The Sandinistas are also trying to organize the Moravian "leaders" behind the FSLN so that they too will later be part of the dialogue. A rigged system.

A rumor from inside Nicaragua is that Bruno is alive. *you heard, he is alive!* Perhaps it is ~~an~~ only wishful thinking. I'm going to Costa Rica at the end of the week. Will be there for a month or more. I'll check things out. Yesterday I returned from a week in Indonesia-- some preliminary stuff on indigenous rights to resources in Southeast Asia and the Pacific-- a Unesco meeting in Jakarta. Had some harsh words with Indonesian officials about Irian Jaya. The struggle is world wide and expanding.

Sorry this is so rushed but I have one of these 100-items lists and but four days.

More from the front later.
